

Bay Blinds

## MATERIALS

### COMPONENTS

Robust, top quality steel headrails provide the foundation for slim slat venetian blinds. Moving parts are manufactured from engineering grade plastics which need no lubrication for the life of the blind.

### SLATS

Choose from solid or perforated 25mm slats which are all heavy-duty 0.21mm thick aluminium and coated with lead free oven baked polyester enamel paint applied over a chemical pre-treatment. This resists scratching and provides superior corrosion protection.

## SLIM SLAT VENETIAN BLINDS

Slim 25mm venetian blinds have been a firm favourite for many years, and are one of the most versatile and practical window coverings you can choose. These versatile blinds fit superbly into any situation in your home or office, whether ultra-modern or traditional.

We offer a premium range of smart contemporary colours, metallic finishes as well as perforated slats that when closed allow a soft filtered light into your room and a view to the outside.

You can use these blinds in your kitchen and bathroom as the aluminium slats are waterproof and simply wipe clean. Each blind also has a wand tilt mechanism to give complete light control, perfect for sunny, north-facing rooms.

Slim slat venetians are an efficient energy control system. Adjustable slats allow you to alter the light entering your room, reducing glare and helping to lower heating or cooling costs.

## OPTIONS

### GUIDEWIRES

Slim slat venetian blinds can be fitted with guidewires for skylight windows. Guidewires can also be used where blinds are attached to doors.

### SLOPING TOP OR BOTTOM

Sloping windows can be accommodated with all types of wide slat venetian blinds.

### LINKED BLINDS

Two or three blinds can be linked together for simultaneous slat tilting.
