

Bay Blinds

## VERTICAL BLINDS

The modern Vertical Blind is a practical and affordable window covering for your home or office. Vertical Blinds are as colourful and decorative as drapes, and as easy to use as venetian blinds. They allow maximum coverage of large windows at a cost-effective price.

Tilting the blades maximises the use of natural light in the workplace, which reduces the need for artificial lighting. This has a positive effect on well-being and enhances productivity.

Choose from an extensive range of premium quality fabrics designed to resist twisting, cupping, shrinking and fading. Many fabrics are sanitised to resist rot and mildew, and are fire resistant. PVC coated light-block fabrics provide privacy and allow for easy cleaning.

Vertical blinds are custom made and are designed to fit your windows perfectly. Blinds can be as narrow as 120mm or as wide as 5 metres.

## MATERIALS

### TRACK COMPONENTS

Tracks are made from marine grade aluminium, with internal components made from engineering grade plastics with overload clutches to prevent damage to mechanisms. All moving parts are lubricated during assembly and need no further attention during the life of the blind.

### FABRIC BLADES

Manufactured from polyester fire resistant fabrics stitched with colour-matched polyester yarn zigzag sewn. 127mm, 100mm & 89mm widths are available.

## OPTIONS

### SLOPING TOP OR BOTTOM

Sloping windows can easily be accommodated with vertical blinds.

### WAND OR CHAIN TILTING

Standard chain operated blade tilting and cord traversing, or optional wand operation.

### MINI PELMET

An optional mini pelmet can clip on to the track.
